

ENHANCED SAFETY PROTOCOLS FOR LIVE EVENTS

The highest standards of safety and hygiene will be applied to Northstar Meetings Group events, both in the planning of the event, and its production and management onsite.

Enhanced Cleaning:

All venues and sites where participants will gather will undergo enhanced, deep cleaning before, during and after our events.

Food & Beverage:

Northstar will work closely with venue partners to employ the highest standard of food safety.

Personal Hygiene:

Hand washing facilities and hand sanitizing stations will be provided at all hotels and venues.

PreCheck:

Northstar discourages attendance from participants who become symptomatic (fever, loss of sense of taste or smell, nausea, etc.) at any time prior to traveling to Northstar events.

Environmental Considerations:

With venue partners, Northstar will review the air filtration provided by the meeting venues' heating, ventilation and air conditioning systems.

Screening:

The Government of Alberta, Canada and Northstar requires that all attendees be vaccinated and provide a negative PCR test to be taken within 72 hours prior to arriving to Canada in order to attend. Proof of vaccination and negative PCR test must be provided to Northstar prior to the event.

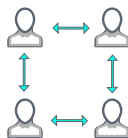

Registration:

Northstar will employ a system that facilitates limited contact badge distribution for all participants.

Masks:

Masks are currently requested for all indoor activities, unless actively eating or drinking or presenting to an audience.

Physical Distancing:

All events will follow local physical distancing guidelines and provide additional physically distanced seating, when space allows.

Medical Support:

Northstar will work with local authorities to expedite medical assistance should it be necessary.

The Canadian Government requires all event participants to be fully vaccinated, as well as provide a negative PCR test.
